

Astronautics

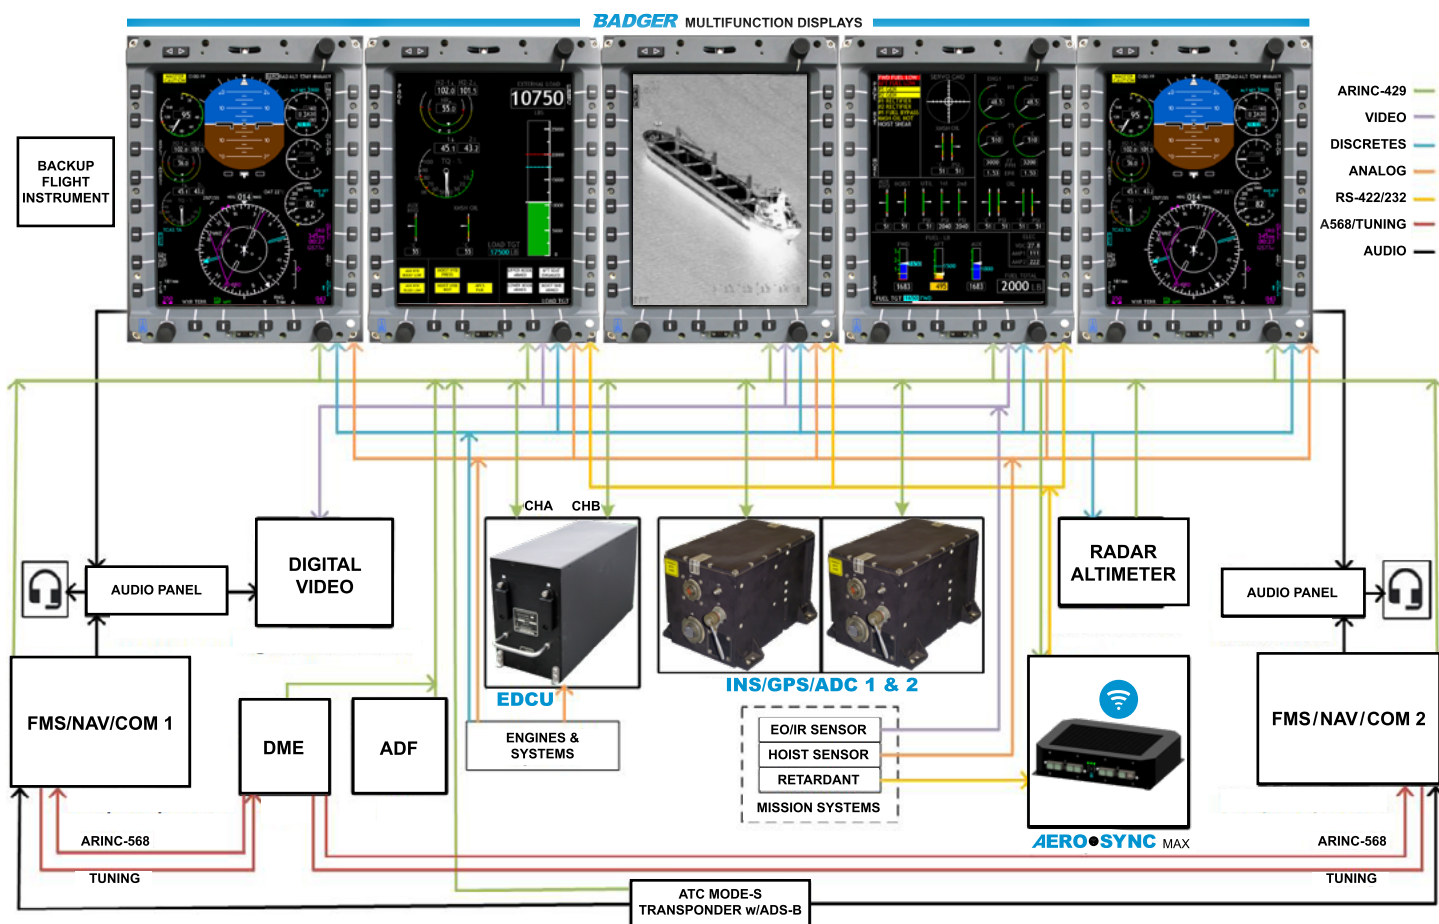

INTEGRATED SYSTEM SOLUTIONS

Astronautics' proven, turnkey system solutions leverage our highly reliable avionics and connectivity products at the core of each system. From initial concept to production, Astronautics works collaboratively with our customers to:

- ✓ **Customize system solutions** that interface and integrate with subsystems from other manufacturers.
- ✓ **Provide a full line of TSO-authorized, baseline products** that can be modified to meet specific user and airworthiness requirements.
- ✓ **Ensure that subsystems seamlessly interface** with each other by verifying the functionality in an onsite System Integration Lab (SIL) prior to ground and flight test.
- ✓ **Deliver a complete solution** that solves tough challenges like:
 - Extending aircraft service life by addressing obsolescence.
 - Upgrading to fully digital cockpits that enhance situational awareness and add mission capabilities.
 - Adding connectivity to improve operational efficiency and enabling wireless, air-to-ground communication.

Complete systems designed with your needs in mind

COMMUNICATION

Ultra-High & Very High Frequencies

MISSION

EO/IR, Digital Map, Retardant Tank, & Hoist

NAVIGATION

VOR/ILS, ADF, DME, FMS, & INS/GPS

SURVEILLANCE

Transponder, Weather, & Terrain

Astronautics' modular systems enable a variety of cockpit configurations

Enhanced with proven connectivity & cybersecurity solutions

THE CONNECTED SYSTEM

Connected | Secured | Automated
